

Native Windows F2: additional work and observed cached cost

● G1 ● G2 ● L1 ● window 4 ▲ window 16

Forward maps per confirmed transition

Forward maps per confirmed transition

All 120 time-executor cells retained. Ratios >1 indicate shorter observed cached sample time.
2 actual tapes/model; replays share those inputs. This pilot does not establish general speedup or inference accuracy.
Fixed-state operation probes overlap and are not an additive cost decomposition.
